

### **Quad Bikes (based on 2 vehicles)**

A four wheeled all terrain vehicle with thick, wide wheels, driven around a specifically designed obstacle course, in and out of the slalom section, under a low pole and through tight circles. There will be a practice session around the course, followed by timed laps. This is more a test of driving skill than speed. Being automatic and with full foot protection these quads are very safe to drive. **£595**
